Allowance of Application # 09/620,533

1. The following communication is in response to applicant's Amendment, received 26-May-2004.

Examiner's Amendment

2. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee. The Examiner respectfully notes that the information for the following Examiner's Amendment was derived from the original claim set, and is considered by the Examiner as the appropriate correction for the minor typographical errors herewith.

Claim 33 line 1 Change "0" to -30--.

Claim 34 line 1 Change "0" to -30--.

Reasons for Allowance

4. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the prior art of record, namely the article by Groller et al., entitled *Modeling Textiles as Three Dimensional Textures*. The improvement comprises a method for modeling knitwear, wherein a macrostructure for a three-dimensional object, based on at least a stitch pattern, is generated; irregularities in stitch positions of the macrostructure are introduced and a yarn microstructure is generated; whereby the yarn microstructure is applied to the macrostructure to yield a knitwear model. This patentable distinction is included in each of the independent claims, nos. 8, 27 and 30. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible < method for modeling knitwear > having the corresponding structure which is disclosed in the specification and equivalents thereof (at least at <page 4, line 15 through page 22, line 15, and Figures 1-18>). In view of the foregoing, the claims of the present application are found to be patentable over the prior art.
